

Enterprise Assessments Delivering Outcomes

ExAM4Enterprise unlocks access to the entire suite of ExAM platform products to provide solutions to meet your data and process management needs through assets & inventory management, complex data collection, facilities & work management, audits & compliance, assessments & inspections, and training & certification. Leveraging the Salesforce platform ExAM4Enterprise extends the Salesforce capabilities to collect, manage, and understand complex data collections to help organizations come to their desired outcome faster.

Collect

Just getting the data is half the battle. Being able to tracking and evolve with a compelling user experience is where the ExAM platform bring arguably the most value when it comes to gathering the data that matters most to your organization.

Manage

The ability to create records and drive existing data into records and to use it as part of your business processes. It more than just the intelligence its about enabling actions and automation through dynamic scoring.

Understand

Through our platforms ability to interconnect and manage data along with the ability to present the data either through reports and dashboard or business documents (pdfs, ppts, etc) enabling you and your team to better understand the data you collect.

Use Cases

- Assets & Inventory Management
- Complex Data Collection
- Facilities & Work Management
- Audits & Compliance
- Assessments & Inspections
- Training & Certification

ExAM Platform

ExAM stands for Extensible Assessment Manager which is a platform that leverages our Assess Anything technology to extract the most out of data collections and simplify business processes across a wide variety of use cases in industry and government.

“We were very lucky to work with the ExAM team to develop a personalized, tailored application for our program. The team was fantastic to work with – they truly listened to our needs, co-designed with us and our users, and were very attentive to completing tasks quickly and ahead of schedule. I give my highest recommendations working with the ExAM team!”

ExAM Platform Features

Assessments are at the center of the ExAM4Enterprise suite of solutions with a focus on providing a platform to configure and assess forms with features such as 20+ unique question types, score forwarding, field mappings, customer styles, decision trees, and more. At its core assessments are using the Assess Anything technology which enables feedback, data calls, and form data directly against standard and custom Salesforce objects.

Distributions are the second most powerful capability with features such as customer viewers and landing pages users are able to create custom user experiences that exceed the standard capabilities of Salesforce such as scheduling and email questionnaires.

Map Builder Plot any accessible object on a map and use scoring or other fields to update pin color. Leverage your location data to gain important insights into your assessment data.

Document Generation With the click of a button create pdfs with custom styles, tables, and charts both natively and non-natively to meet your business and security needs.

Create your own innovation laboratory to enable your technology to evolve with your business processes.
