

ExAM Asset Management

Field Services & Facilities are massive ExAM use case and often involve managing the materials needed to service downstream customers.

Our Asset & Inventory extension for ExAM makes it easy to keep track of the materials you need to support the work order management and field services use cases you have in the field today.

Our Asset & Inventory management app makes it easy to take a simplified approach to managing inventory but can be scaled in order to provide comprehensive coverage of inventory transactions and locations.

Founded in 2011, Millsapps, Ballinger & Associates is committed to connecting our customers' missions to meaningful outcomes through technology. Industry-leading products and platforms like ExAM4Enterprise, ExAM4Inspections, and ExAMRV empower enterprises to gather, manage, and assess their data as it flows through business processes inside and outside of their organization.

Asset Stores

These "stores" are the types of assets you manage everyday at a particular location.

Asset Line Items

Details matter. We help you manage down to the serial number level if you need it.

Asset Transactions

Items move locations, get installed and removed. Know what, when, where and how much with ease.

Actionable Insight

Understand inventory levels and costs at a glance, at the location level and the enterprise.

Shopping Lists

Easily build lists of what you need to support work orders and services, get them approved and process transactions.

Scalable & Secure

Powered by Salesforce and available on the AppExchange.

Understanding ExAM

ExAM stands for Extensible Assessment Manager which leverages Assess Anything technology to extract the most out of data collections and simplify business processes across a wide variety of use cases in industry and government with in Salesforce. ExAM's inspection, audit, compliance & data collection capabilities help organizations perform inspections, assessments and complex surveys.
