How ExAM4Inspection Works?

ExAM4Inspection is a native Salesforce application and mobile application operating is an extension of MB&A's ExAM platform that is powered by Salesforce to provide a configurable inspection framework. It can work out-of-the-box with some light configuration however most users today choose to fully customize the solution to meet their specific use case.

Capabilities

Pre-built Reporting

This includes standard reports and dashboards, intuitive analysis features, and the capability to leverage bleeding edge technology like Salesforce Einstein AI's predictive analytics.

Inspection Suite

A comprehensive suite of tools for developing inspections, quality assurance, and data collection forms and interfaces to drive efficiency, cost savings, and ease of reporting.

Easy to Configure

Provides administrators with an easy to use interface for configuring the ExAM app to ensure your team gets the information they need in the field.

Secure

ExAM is used in secure federal and healthcare environments which is why we built it on Salesforce platform that meets stringent standard like FedRAMP, DoD IL4, HIPAA and many others.

Mobile

Offline

Perform inspections offline and in the field

Cross Platform

iOS and Android apps available

Powerful

Take pictures, collect signatures, enable decision trees

What is ExAM

ExAM stands for Extensible Assessment Manager which is a platform that leverages our Assess Anything technology to extract the most out of data collections and simplify business processes across a wide variety of use cases in industry and government.

About MB&A

MB&A is a technology company founded in 2011 by Joshua Millsapps and Erik Ballinger with the idea that driving outcomes for customers is paramount. Over a decade later, that has not changed. We empower our customers to collect, manage, and understand their data as it flows through operational processes inside and outside their organization. Our team of experts bring the experience of large consulting organizations, with the agility of an agile software. For more information, visit www.mbaoutcome.com.
