

Enterprise-grade Inspection and Assessment Solutions

How data management directly affects the well-being of your employees and customers.

Inspections, assessments, and audits are really data management issues at their core. The main issue we hear is that organizations are using paper or not using inspection data at all because existing solutions are not meeting their industry or company-specific needs and use cases.

With ExAM4Inspections you have a proven inspection-specific solution that grows with your organization and can improve compliance, safety, and your customers and employees' experience by providing meaningful reports and analytics. ExAM4Inspections provides a user-friendly platform to efficiently collect, manage, and understand inspection data, both at the office and in the field. Now, you can collect data more thoughtfully and efficiently, evaluate the data almost instantaneously, and use it to improve the experience and wellbeing of your workforce and customers.

Industries

Agriculture

Supporting laboratory and on-site assessments to ensure safety and quality standards are followed for consumers and employees.

Building/Construction

Leveraging inspections to ensure construction sites and buildings are up to code and the work was performed as instructed.

Facilities & Housing

Helping meet audit requirements and health and safety requirements for UPCS and HSQ at over 250 housing authorities.

Health Care

Facilitating inspections to ensure hospital quality and safety throughout the properties, facilities, laboratories, and rooms.

Results: **500,000+** Inspections

How ExAM4Inspection Works

ExAM4Inspection is a native Salesforce and mobile application that leverages MB&A's ExAM technology to provide a configurable inspection framework. ExAM4Inspection can work as either an out-of-the-box solution with light configuration or as a fully customized solution to meet specific use cases.

Capabilities

Pre-built Reporting

ExAM's reporting features include standard reports and dashboards, intuitive analysis features, and the ability to leverage cutting-edge technology like Einstein's predictive analytics.

Inspection Suite

ExAM provides a comprehensive suite of tools for developing inspection, quality assurance, and data collection forms and interfaces.

Easy to Configure

ExAM provides administrators with an easy-to-use interface for configuring the application to ensure your team gets the information they need in the field.

Secure

Secure federal and healthcare environments trust ExAM thanks to its safe Salesforce platform, which meets stringent standards such as FedRAMP, DoD IL4, HIPAA, and many others.

Mobile

Offline

Perform inspections offline and in the field

Cross Platform

iOS and Android apps available

Powerful

Take pictures, collect signatures, and enable decision trees

What is ExAM

ExAM (Extensive Assessment Manager) is a platform that extracts the most out of data collections and simplifies business processes across a wide variety of use cases in industry and government by leveraging our "Assess Anything" technology within Salesforce.

About MB&A

MB&A is a technology company founded in 2011 by Joshua Millsapps and Erik Ballinger with the idea that driving outcomes for customers is paramount. Over a decade later, that has not changed. We empower our customers to collect, manage, and understand their data as it flows through operational processes inside and outside their organization. Our team of experts bring the experience of large consulting organizations with the power of agile software. For more information, visit www.mbaoutcome.com.
