

Enterprise Assessments Delivering Outcomes

ExAM4Enterprise unlocks access to the entire suite of ExAM platform products to provide solutions to meet your data and process management needs. Our products cover assets and inventory management, complex data collection, facilities and work management, audits and compliance, assessments and inspections, and training and certification. ExAM4Enterprise helps organizations come to their desired outcome faster by collecting, managing, and understanding complex data collections by leveraging the Salesforce platform and extending its capabilities.

Collect

Gather the data that matters most to you using the ExAM platform. Our tools allow you to track and evolve with a compelling user experience, bring added value to your data collection processes.

Manage

Organizations can create records, drive data into existing records, and use records as part of their business processes with ExAM. We use intelligent tools to enable actions and automation through dynamic scoring.

Understand

Our platform gives you the ability to interconnect and manage data, in addition to presenting the data through reports, dashboards, or business documents (PDFs, PPTs, etc.). ExAM enables you and your team to better understand the data you collect.

Use Cases

- Assets & Inventory Management
- Complex Data Collection
- Facilities & Work Management
- Audits & Compliance
- Assessments & Inspections
- Training & Certification

ExAM Platform

ExAM (Extensive Assessment Manager) extracts the most out of data collections and simplifies business processes across a wide variety of use cases in industry and government by leveraging our "Assess Anything" technology.

“We were very lucky to work with the ExAM team to develop a personalized, tailored application for our program. The team was fantastic to work with – they truly listened to our needs, co-designed with us and our users, and were very attentive to completing tasks quickly and ahead of schedule. I give my highest recommendations working with the ExAM team!”

Andrea Ippolito,
VA Innovators Network Lead, VA Center for Innovation

ExAM Platform Features

Assessments are at the center of the ExAM4Enterprise suite of solutions with a focus on providing a platform to configure and assess forms with features such as 20+ unique question types, score forwarding, field mappings, customer styles, decision trees, and more. Assessments are using the “Assess Anything” technology to enable feedback, data calls, and form data directly against standard and custom Salesforce objects.

Distributions are the second most powerful ExAM capability, with features such as customer viewers and landing pages. Users can create custom experiences that exceed the standard Salesforce capabilities, such as scheduling and email questionnaires.

Map Builder Plot any accessible object on a map and use scoring or other fields to update pin color. Leverage your location data to gain important insights into your assessment data.

Document Generation With the click of a button create pdfs with custom styles, tables, and charts both natively and non-natively to meet your business and security needs.

Create your own innovation laboratory to enable your technology to evolve with your business
